July 11, 1931

Dear Sirs,

A customer of ours is very anxious to secure a book in the nature of an encyclopedia on old and rare American coins. He would like to have it as descriptive and historical as possible. We were unable to find anything very satisfactory in the publishers' catalogue, and would like to have you send us the best thing that you might have or recommend to us the publication of someone else. Thank you for any assistance you are able to give us.

Yours truly,

Rowen Crawford

Portland, Oregon.

Attention: Rowen Crawford

Gentlemen:

Yours of the 11th is at hand and I fear you will have to inform your customer that there is no such book available. The best of the books listing coins on which premiums are paid is that published by Wayte Raymond, 465 Park Avenue, New York City, but there is no information as to the pieces involved and since the rarity is largely dependent upon the circumstance that for a given year a much less than the usual number of the rare type was struck, it would not be possible to provide either much description or history under the circumstances.

Very truly yours,

SN:JG

Secretary
